

Quality, Health, Safety and Environmental Policy

Ineltrón Solutions S.L., as a consequence of its sustainability and corporate social responsibility policy and, for all its activities of design, construction, commissioning, start-up, operation and maintenance of electrical, instrumentation and control industrial facilities, is committed to the following in Quality, Health, Safety and Environment:

1. Integrate the Quality, Occupational Health and Safety and Environment in the decision-making of the company's management, strategic business plans and in all the activities in all levels of the organization, establishing objectives to be reviewed periodically.
2. Promote a continuous improvement in its work methods, supporting a prevention philosophy before correction.
3. Satisfy Clients' expectations, applying the utmost rigour in the quality control of products and services, that must be necessarily safe in operation and maintenance.
4. Acknowledge the level of satisfaction of its clients and implement feasible and appropriate improvements in each situation.
5. Provide adequate and continuous training to staff and collaborators, promoting Quality and HSE knowledge and awareness.
6. Optimize the use of energy and natural resources, minimizing the environmental impact and promoting the innovation and use of the best available technologies.
7. Communicate relevant and verified information about the activities performed.

Ineltrón Solutions S.L. declares that this policy is implemented and communicated to every level of the Organization, as well as externally.

December, 2016

Pablo Viqueira Grandal
Executive Director of Ineltrón Solutions S.L.
