We are the key partner to guarantee the best results in any turnkey project, optimizing time and cost under high standards of quality, safety and sustainability.

SERVICES

Comprehensive service: from engineering to maintenance.

ELECTRICAL, INSTRUMENTATION AND CONTROL CONSTRUCTION WORKS IN INDUSTRIAL PLANTS

Design and assembly of industrial electrical, instrumentation and control facilities in several sectors. INELTRON guarantees effective and customised solutions that ensure the viability and success of national and international projects.

Direct execution, staffing
and/or supervision.

PRECOMMISSIONING, COMMISSIONING, START-UP, OPERATION AND MAINTENANCE

Our specialists entirely perform and supervise the processes in all their phases, from assembly strict adherence to engineering to the implementation and verification of the final functionalities and subsequent maintenance during operation.

Design, development
and commissioning.

AUTOMATION AND CONTROL

The integration of new technologies in the industrial engineering filed allows to control, visualize and optimize the automated processes, their productivity and maintainability, ensuring the best return during the entire lifecycle of the installation.

Design, supply, fabrication,
assembly and commissioning.

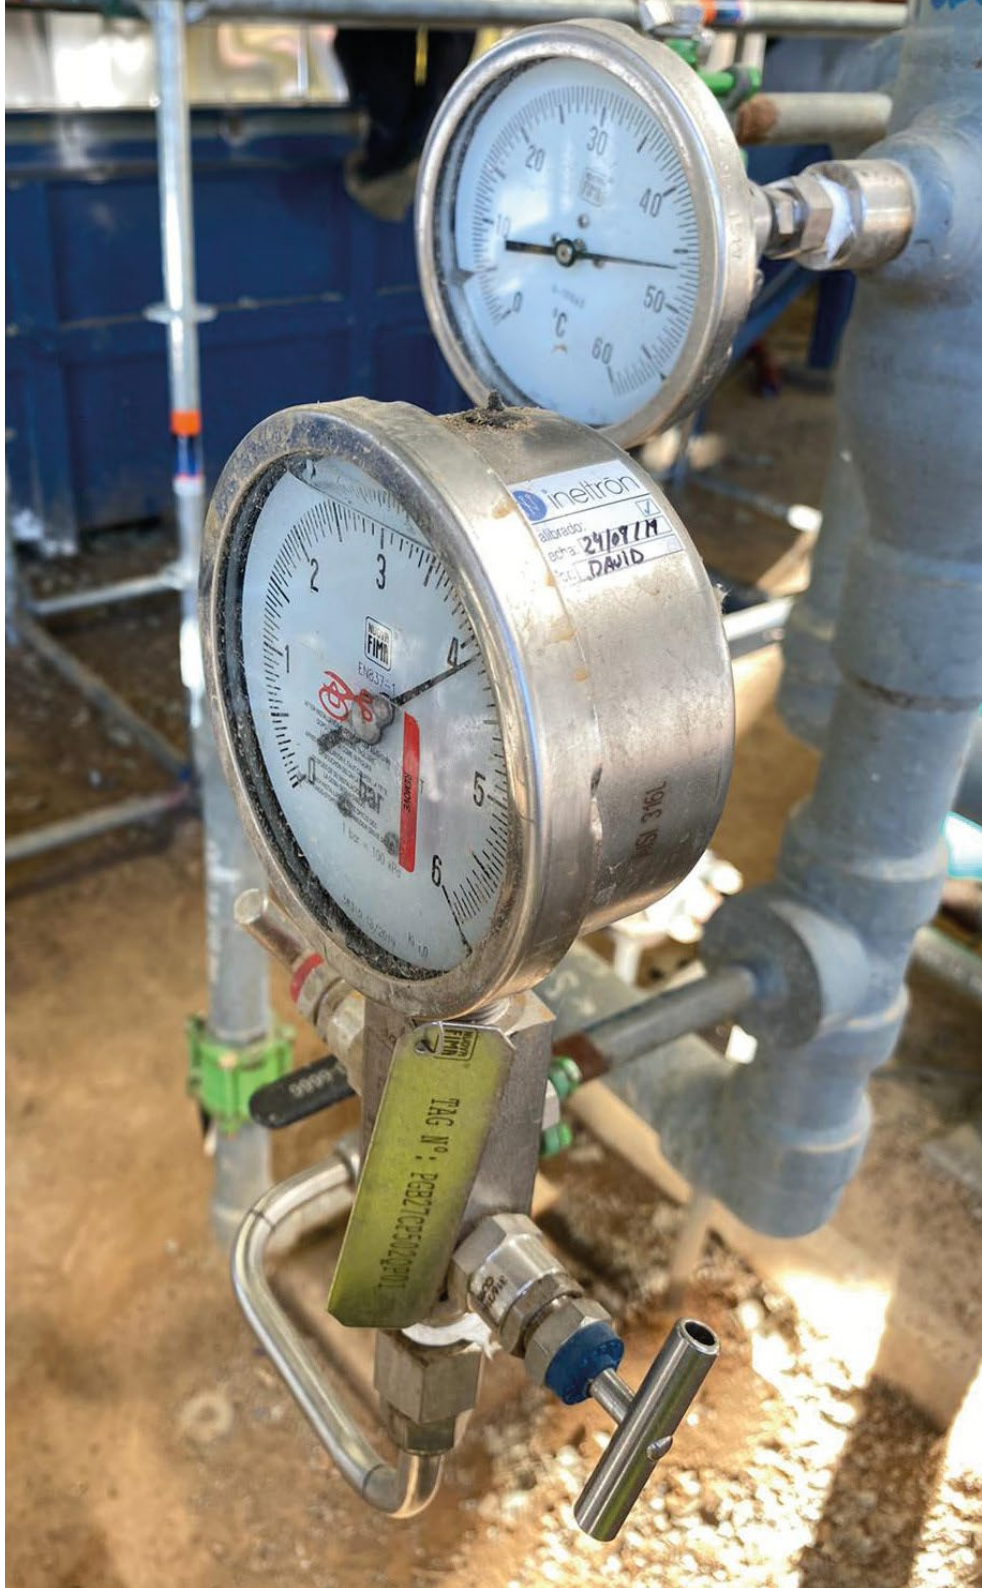
FABRICATION OF ELECTRICAL PANELS

We have a variety of technical solutions for the design and fabrication of customized electrical and control panels, adapting quality and safety to the specific production needs and to each type of installation.

Calibration laboratory for electrical magnitudes, pressure and temperature traceable to ENAC standard.

CALIBRATION LABORATORY

We have our own calibration laboratory for electrical magnitudes, pressure and temperature. Therefore, we guarantee that our clients have accurate measurements in their electrical and instrumentation devices.



MARKETS

INELTRÓN has a headquarter in Spain and commercial offices in Portugal, Lithuania and the United kingdom, form where we manage our international presence in several countries of Europe, Asia and Africa.

HEADQUARTERS · MAIN OFFICE
Betanzos · A Coruña

SPAIN

Our headquarters are located in the northwest of the Iberian Peninsula, origin of our company and, together with the commercial office located in Madrid, the place from where our daily activities, workers and teams along the world are coordinated and managed simultaneously.

As a result of our international activity after the integral execution of outstanding industrial plants in these countries, INELTRON established delegations in Portugal, Lithuania and the United Kingdom, which allows us to facilitate and speed up the response time to the maximum within our international radius of action.

CSR

Corporate Social Responsibility

We are a company committed to sustainable development, contributing to social well-being, environmental balance and economic progress in all our business fields, creating shared value in the long term for society.

This commitment has been captured in the Sustainability and Corporate Social Responsibility Policy, which governs all the activities of the organization and its staff, in order to meet the highest professional and ethical standards of transparency, respect for human rights, environment and the local communities where the company performs its activities.

Furthermore, INELTRÓN makes an additional commitment in its Quality, Health, Safety and Enviromental Policy, settling customer satisfaction, continuous improvement and zero tolerance with occupational risks in the centre of its activities and placing INELTRÓN as a leading company in the sector.

In order to reinforce these responsibilities, INELTRÓN has certified its Quality Management System according to ISO 9001:2015 standard, its Environmental Management System according to ISO 14001:2015 and its Occupational Health & Safety Management System according to ISO 45001:2018. These three certificates guarantee that, assessed by an external entity, Ineltrón management complies with the highest standards in these fields.

Finally, in compliance with legal requirements and following its compliance and customer centre policy, Ineltrón is registered in the Spanish Accredited Company Register (R.E.A.), enrolled and with all documentation in force in Repro and Obralia, as well as registered as low voltage and high voltage installation company.
